Las Vegas, NV 89108

August 14, 1992

Dear Mr. Doyle:

This will acknowledge receipt and acceptance of your Notice of Intent for placer mining on the Desert #28 claim in T. 42 S., R. 11 W., sec. 15 filed on July 31, 1992. The Notice of Intent is designated as UTU-70013.

Copies of the information provided in this Notice of Intent has been forwarded to the Utah Division of Oil, Gas, and Mining (UDOGM). Therefore, you will not be required to provide this information to UDOGM. However, reclamation under this notice is required within the specifications of the Utah Mined Land Reclamation Act.

In your August 3, 1992 telephone conversation with Larry Gore you indicated no operations were planned on the Metalliferous #27 claim, so we are not accepting your submission of July 8, 1992.

We would like to stress the portion of the 43 CFR 3809 Surface Management Regulations which requires that you reclaim the land and take reasonable measures to prevent unnecessary or undue degradation of the Federal lands during your operation. A copy of the Dixie Resource Area conditions of acceptance are enclosed with this letter and are to be made a part of the Notice you submitted.

Acceptance of the Notice will not now, or in the future, serve as a determination of the validity of any mining claim to which it may relate.

If your operations extend for more than a year, please advise us of the status of your mining activities on the anniversary of your notices.

If you have any questions, please contact Larry Gore of this office.

Sincerely,

/s/Dale Ross

Dale Ross
Acting Area Manager

CEDAR CITY DISTRICT OFFICE
BUREAU OF LAND MANAGEMENT
ATT: MR. LARRY GORE
225 N. BLUFF ST.
ST. GEORGE, UTAH 84770

Dear Mr. Gore:

RE: Notice of Intent UTU-70013

Our testing on Desert #28 placer claim in T. 42, S., R. 11 W., Sec. 15 and intend to reclaim the land. Since vegetation was not disturbed, we intend to hand shovel some ore out of some shrubs. This, according to our reading of the relevant sections, satisfies the reclamation requirements. Although no vegetation was disturbed and the material is a clay based material that should not erode, we do have a thought that it may be better to transplant a few of the local scrub bushes to the area. We would appreciate it, that if your in the area, to look the disturbed area over and give us your thoughts and concerns. Should we not hear from you, we will proceed with reclamation according to our reading of the act and file the reclamation notice with your office.

Yours truly,

President
Mr. Jack Doyle

Mr. Jack Doyle
Desert Mining Co.
6340 Greyhawk Ave.
Las Vegas, NV 89108

Dear Mr. Doyle:

We received your letter of January 25, 1993 outlining your reclamation plans for the Desert 28 claim in T. 42 S., R. 11 W., sec. 15. The inspection on November 18, 1992 showed there was a working face approximately 3 feet deep at the work site. If not already done, this face will need to be reshaped to a slope of 3 (horizontal) to 1 (vertical) as required by 43 CFR 3809.1-3(d)(4). Due to the small area of disturbance, no seeding is required; however, you may attempt to transplant shrubs from the immediate area if you wish.

As soon as the roads are dried out, we will inspect your site and notify you if further work is needed.

Please notify us when you have completed the work outlined in your letter.

Sincerely,

/s/Debbie J. Pietrzak

Debbie J. Pietrzak
Area Manager
